

## SUMMARY

Performance-oriented and user-centric Front-End Developer with over 8 months of practical experience in creating responsive, modular web applications utilizing React.js, JavaScript, and contemporary UI frameworks. Proven ability to develop scalable user interfaces, enhance load times by 40%, and work effectively within Agile teams. Familiar with full-stack development, including Node.js, PostgreSQL MongoDB, and AI-driven systems. Committed to providing smooth user experiences, boosting performance, and tackling real-world problems through coding.

## EDUCATION

### Bachelor of Computer Applications (BCA)

Maharshi Dayanand Saraswati University (MDSU),  
Ajmer . 2022 – 2025

## TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Zustand, Tailwind CSS, Bootstrap, Figma to Code, Responsive Web Design.
- **State & Form Management :** React Hooks, Context API, Redux, Formik, React Hook Form, Yup, Zod.
- **Backend Exposure:** Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, JWT Auth.
- **API & Tools:** RESTful APIs, Axios, Postman, Git, GitHub , Docker

## CORE STRENGTHS

- **JavaScript Proficiency:** Building robust, scalable UI logic
- **Performance-Driven:** Focused on speed, UX, and memory optimization
- **Agile & Collaborative:** Strong communicator in remote and cross-functional teams

## ACADEMIC ACHIEVEMENTS

- **Outstanding Tech Talent Award** – BCA 3rd Year (2024–25) Awarded for exceptional technical skills and academic performance.
- **Excellency Award** – BCA 2nd Year (2023–24) Recognized for academic excellence

## PROFESSIONAL EXPERIENCE

### Frontend Developer Intern

MetaCaps IT Solutions | Dec 2023 – Sept 2024 | Bijainagar, Ajmer

- Developed reusable, scalable UI components in React.js based on Figma designs and WCAG accessibility standards.
- Translated design prototypes into performant, pixel-perfect web interfaces, reducing UI feedback cycles by 25%.
- Integrated RESTful APIs and managed application state using React Hooks and Context API.
- Optimized rendering logic with memoization and code-splitting, increasing load speed by 40%.
- Participated in Agile sprints, collaborating with cross-functional teams to ensure timely project delivery.

## PROJECTS

### LeetLab – Online Code Execution Platform

- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, Prisma ORM, PostgreSQL, Judge0 API
- Developed REST APIs for managing users, problems, and submissions using Node.js and Prisma ORM.
- Integrated Judge0 API for live code execution and real-time verdicts.
- Built a responsive and dynamic UI using React.js and Tailwind, including role-based access via JWT.

### AI-Powered Code Review & Generation Tool

- **Tech Stack:** MERN (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, Google Gemini API
- Built a full-stack AI application to automate code review, bug detection, and smart code suggestions.
- Integrated Gemini NLP model for real-time code analysis and response generation.
- Designed a responsive React frontend and Node.js backend with REST APIs and MongoDB persistence.

## CERTIFICATIONS

- FULL STACK WEB DEVELOPMENT-1.0  
(By - **physics wallah**)
